

Premium Add-on device for your home

This device allows connecting various brands of VRV/VRF or duct air conditioning systems, such as Daikin, Hitachi, and Gree, to the Belahome IoT platform for smart control. It comes with a built-in Belahome Zigbee module, Bluetooth upgrade functionality, and supports both standalone operation and integration with existing control panels, along with remote fault diagnosis and a specialized Bluetooth app for control testing.

Features

- Connects multiple VRV/VRF or duct AC units from brands like Daikin, Hitachi, Gree to the Belahome IoT Platform for smart control.
- Features a built-in Belahome Zigbee module for controlling air conditioning via the Belahome smart app.
- Allows both independent connection to air conditioning and integration with the existing panel, with automatic master-slave adaptation.
- Supports wired centralized control for streamlined management. Includes a Bluetooth function for on-site firmware upgrades as needed.
- Offers a dedicated Bluetooth mini-program for testing AC controls and accessing operational data and fault codes. Provides remote fault diagnosis to quickly identify and resolve issues with efficient service response.

Specification

- Model Number: B25L
- Power Type: AC indoor unit
- Working Temperature: -20 ~ 60°C
- Working Humidity: 0 ~ 90%RH
- Output power: DC 8.5V
- Product Size: 85×85×28mm
