

Premium Add-on device for your home

This is smart door/window sensor, adopts super low power consumption ZigBee wireless networking technology, makes a longer battery life-span, can feel open or close state of the door or window through closing and separating between sensor and magnetic, dual sensor design, flexible and adaptable, products are suitable for home, villa, factories, shops, banks, office building and other place of safety prevention.

Features

- Standard ZigBee protocol, good compatibility;
- Super low power consumption design, battery lifespan up to 1 year;
- Real time monitoring closed/open start of door or window;
- Double reed switch design, suitable for door or window with different direction;
- Support disassembly alarm;
- Easy replacement of the battery;
- Low battery indication;
- Free tool installation, stick and play;
- CE, ROHS, FCC approval;

Specification

- Model Number: MIR-MC100
- Power Supply: DC3V
- Working Temperature: -10 ~ +55 °C
- Connections: ZigBee
- Battery Life: More than one year
(20 times per day)
- Battery Type: CR2032 battery
- Low Battery Indication: Yes
- Alarm Triggering Distance: 23±5mm
- Shell Material: Fire-proof PC+ Fire-proof ABS
- Transmitter Dimensions: 52.6x26.5x13.8mm
- Magnet Dimensions: 25.5x12.5x13mm
