Smart In-wall Air Quality Detector

Premium Add-on device for your home

The intelligent environment detection panel is an air quality monitoring terminal that can be equipped with PM2.5 sensors, temperature and humidity, formaldehyde, CO2 and other sensors, and supports wireless or RS485 communication. It can measure PM2.5, temperature, humidity, formaldehyde, CO2, TVOC, light, etc. at the same time. It can be widely used in residential, commercial and industrial occasions, and can effectively improve air quality and create a healthy, comfortable, efficient, environmentally friendly and energy-saving living and working environment.

Features

- **Comprehensive Monitoring: Equipped with diverse sensors for accurate air quality analysis.**

- **Versatile: Suitable for residential, commercial, and industrial use.**

- **Connectivity: Supports wireless or RS485 communication for data transmission.**

- **User-Friendly: Auto screen wake-up feature within a 50cm range.**

- **Network Access: Provides easy and intuitive network settings.**

Specification

- Model Number: PMT300-SGM-ZTN

- Power Supply: 100V~240V AC

- Working Temperture: -10°C~+55°C

- Working humidity: 0 ~ 95 % RH

- Product size: 86mm×86mm ×59mm

- Connections: RS485/ZigBee and other wireless(subjectto specific models)

- Display: TFT screen
